

BlueSky Process Solutions designs and manufactures innovative and advanced high-performance products for severe service piping applications.

All our products are engineered and manufactured to withstand corrosion, erosion, high and cyclic temperature and pressure, in accordance with the highest industry standards and within an ISO 9001 certified environment.

At BlueSky, we are committed to building relationships and strategic partnerships with our clients through un-matched customer service, cost-competitiveness, and value. We strengthen and broaden our customer base by providing:

- Value oriented pricing
- Timely delivery
- Total quality assurance
- High level engineering support
- Commitment to customer satisfaction

Success is in the pipeline, think BlueSky!

Your challenge
is our focus,
our solution
is your success.

BlueLock™ SOLUTIONS

The BlueLock clamp connector is a **reliable**, easy-to-assemble, metal-to-metal sealed joint designed for use in piping systems requiring high-integrity seals in a variety of applications.

- Standard size from 1/2" to 30", larger sizes available
- Capable in excess of ASME/ANSI 4500#
- High-temperature capability up to 1500°F
- High-integrity in corrosive, erosive, cyclic, high-pressure, and high-temperature applications
- Virtually unaffected by external loads/pressures
- Highly reliable all metal seal
- Self-energized and pressure-energized seal
- Zero fugitive emissions

RotaBall™ SOLUTIONS

FlexBall™ SOLUTIONS

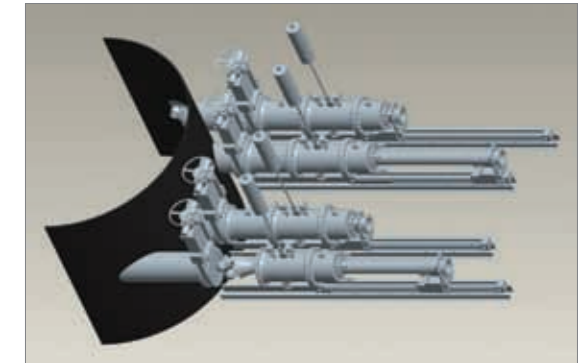

These **innovative** high-pressure, high-temperature ball joints are designed to dramatically reduce pipe stress in systems that develop high-bending loads due to thermal and/or mechanical movement.

- Standard size from 3/4" to 24", larger sizes available
- Capable up to ASME/ANSI 2500#
- High-temperature capability up to 1500°F
- 360° of rotational freedom
- 30° total flex capability
- Chrome-plated ball for superior wear and smoother performance
- Independent packing compression
- Field adjustable packing and inline maintenance

Custom Engineered Solutions

BlueSky's in-house design, engineering, and manufacturing **expertise** is the foundation that supports any requirements for custom solutions or the integration of our products. Our wide industry experience ensures unsurpassed technical assistance and support in the most challenging applications.

Retractable feed nozzle assemblies used in froth treatment.

BlueSky's unique ability to customize designs and build to exacting special requirements has made us the supplier of choice in providing custom solutions:

- Piping system design and fabrication
- Pigging components and systems
- Manifolds, strainers, and compact flanges
- Advanced materials and coatings
- Special approvals, testing, and certification
